

Ahmad Arnaoute

Bucharest, Romania

 Ahmad1827 |  ahmad-arnaoute |  ahmadarnaoute1896@gmail.com

SUMMARY

A creative and persistent Computer Science student with advanced knowledge of C/C++, Java, Dart, and core computer science fundamentals. Highly passionate about problem-solving and adaptable to diverse challenges, seeking a software engineering internship to apply technical expertise and contribute innovative, out-of-the-box solutions.

EDUCATION

2024–2028 **B.Sc. Computer Science (CTI)**, University Politehnica of Bucharest
2020–2024 Baccalaureate Diploma, George Călinescu Theoretical High School, Bucharest
Specialization: Mathematics and Computer Science

EXPERIENCE

Independent Developer

2023–Present

- Designed and implemented cross-platform apps and games with modular, maintainable code.
- Applied Object-Oriented Programming principles to design scalable, reusable modules for multiple projects.
- Built a tutoring platform using Flutter and Firebase, featuring user authentication and responsive design.
- Completed projects in C/C++/Assembly/Rust focused on algorithms and systems.
- Maintained and regularly updated an indie-game portfolio on itch.io (AtodDev), publishing several games and small projects in C++ / SDL2, Java (Android) etc.
- Used Git and GitHub for version control, iterative development, and project organization.

PROJECTS

Tutoring Platform (Flutter/Dart, Firebase)

[Portfolio](#)

Developed an online tutoring system connecting students and tutors. Implemented real-time database synchronization, authentication, and reusable UI components.

Android Games (Java, Android Studio)

[Google Play](#)

Created several Android games including *Flying Cat*, *RockCat*, and *Cat Word Search*. Focused on gameplay mechanics, animations, and performance optimization

AtodDev (itch.io) – Indie Game Portfolio

[atoddev.itch.io](#)

Published multiple games and small apps in C++/SDL2, Java, and Flutter. Projects showcase strong OOP design, modular code, and UI/UX considerations. Examples: Pong, Snake, Sudoku, Android games on Google Play.

C to Assembly Translator (C)

[GitHub](#)

Built a compiler-style program translating C statements into Assembly instructions. Demonstrated low-level architecture understanding and parsing logic.

Chunk Physics Simulator (C)

[GitHub](#)

Created a 3D simulation engine for object collisions and physical interactions. Focused on performance and data-oriented design.

SKILLS

Programming Languages	C, C++, Rust, SQL, Assembly, Java, Dart, MATLAB, HTML, CSS, JavaScript
Frameworks & Tools	Flutter, Android Studio, Firebase, SDL2, Git, GitHub, VS Code
Core Competencies	Algorithms, Data Structures, Systems Programming, Object-Oriented Design, Software Architecture
Soft Skills	Problem Solving, Creativity, Communication, Adaptability, Self-Learning, Teamwork
Languages	English (Advanced), Romanian (Native), Arabic (Intermediate)

INTERESTS

Game development, new technologies, problem-solving, chess.
